BADOTHERM®

BDT18 – Process pressure gauge 63mm

Product description

Badotherm pressure gauge model BDT18 is manufactured according to the EN837-1 and is available in full stainless steel or Alloy 400 wetted parts in a stainless steel case. This pressure gauge is typically used for applications in the chemical, petro-chemical, oil & gas, power and utilities, machine building and general process industries. Safety comes first, with a blow-out feature, pressure elements made of high quality tubes. These gauges are designed to withstand the severest of operating conditions of the ambient environment and the process medium.

Design standard

EN837-1

Dial sizes, ranges & accuracy

Possibilities in ranges and accuracies are led by the dial size Accuracy class is based on dry gauges. Liquid filling can affect the accuracy.

Dial size	Ranges	Accuracy
63mm	01 to 01000 bar	1.6%

Mounting variation

Not all gauges are suitable for some mounting variations. For the BDT18 series the mounting variations are below.

- type A (10) bottom connection, direct mounting
- type B (33) Lower-back connection U-bracket
- type C (11) bottom connection, surface mounting (back)
- type D (30) Lower back connection, direct mounting
- type E (32) lower back connection, panel mounting (front)

More specifically per dial size:

Dial size	А	В	С	D	Е	F
63mm	•	•	•	•	•	

Process connection

Dial size	Standard thread	optionally	SW size
63mm	G ¼ A or ¼ " NPT	1/8"	14mm

Other thread standards such as ISO 7-1 R (BSPT), or DIN 13-1 (Metric) can be selected as well.

-> See datasheet "thread information" for specific thread details

Materials of construction

	BDT18	BDT18M				
Case	AISI 304 (optionally 316)					
Bezel	AISI 304 (0	puonally 316)				
Connection ¹	AISI 316	Alloy 400				
Sensing element ¹	AISI 316	Alloy 400				
Movement	Stainle	ess steel				
Pointer	Aluminium					
Dial	Auminium					
Window gasket	Ν	IBR				
Blow out	ľ					
Fill plug	NBR (HNBR f	or filled gauges)				
Mounting flanges	AIS	SI 304				
Window	Laminated safety glass					
*1 wetted materials						

Pressure limitations

The gauge are built to withstand harsh environments however the EN 837 limits the use of a pressure gauge according below table.

Dial size	Steady	Fluctuating	Short time
63mm	0.75 x FSV	0.67 x FSV	FSV
FSV: full scale value			

Temperature limitations

The gauges can withstand ambient and process temperature up to a certain limit. The limitations on temperature are:

	Ambient	Medium
Dry	-40°C+60°C	-40°C+200°C
Filled	-20°C+60°C	-20°C+90°C

The variation of indication caused by the effect of temperature shall not exceed: $\pm 0.4\% / 10K$ FSV

Window

Standard BDT18 63mm has a laminated safety window. Options such as glass, or acrylic windows are available.

Pointer

Standard pointer is a fixed black painted aluminum pointer. There are several types of pointers available:

- Adjustable slotted pointer

Dial facing

The dial plate is made from aluminum and coated with UV resistant white coating. The black dial markings, scale, numbering, and interval is according the EN 837. Options like colored dial, customer logo, or colored segments are possible as well. Scale interval and numbering is following the EN837.

Limit stop

To prevent permanent damage after overpressure, or sudden vacuum the gauge is protected by a stop pin on the dial.

Degree of protection

The BDT18 has a standard degree of protection of IP65. The values are determined according the IEC/EN 60529.

Case filling

The gauges can be filled with different kind of fill fluids. The fill fluids available are:

- BPF01 Glycerine 86%
- BPF02 Silicon
- BPF04 Foaming service
- BPF05 ECTFE inert fluid for oxygen service
- BPF06 Glycerine 99.5%

Restrictor Screw

All gauges can be executed with a restrictor of 0.8 or 0.3 orifice in AISI316.

Special service

The gauges can be supplied cleaned for oxygen use. This means the gauge is assembled and tested in a special area free of oil. The gauges are individually packed in a plastic bag with marking. The symbol:

Certification & Declaration

Calibration

Gauges are full range calibrated as a factory standard. Optionally you can select a 5 points calibration certificate, and a 10 points calibration certificate for the 0.6% and 0.5% gauges.

Pressure Equipment Directive - 2014_68_EU

PED approval is given according article 3.3 and is valid for ranges >200 bar. All gauges will be marked accordingly. A declaration of conformity can be supplied.

ATEX 114 - 2014/68/EU

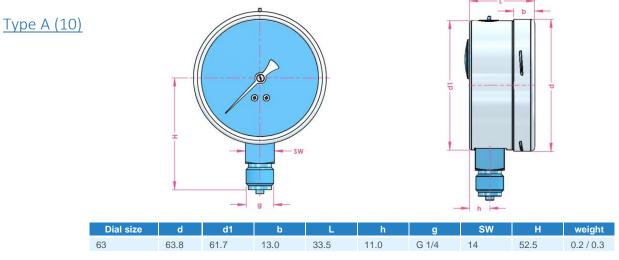

ATEX restrictions are explained in the IOM and in the ATEX background datasheet.

EN 10204 material certificate

A material 3.1 certificate on the wetted parts can be supplied.

Dimensions table

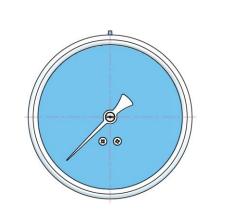

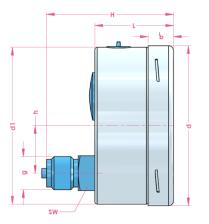

Type B (33)
