

# BDT30 – Contact pressure gauge 100 mm

## Product description

Badotherm pressure gauge with contact under the dial model BDT30 is manufactured according to the EN837-1 / DIN 16085 and is available in full stainless steel or Alloy 400 wetted parts. This pressure gauge is typically used for applications in the chemical, petro-chemical, oil & gas, power and utilities, machine building and general process industries. Safety comes first, with a blow-out feature, pressure elements made high quality tubes and the welded type connection construction. These gauges are designed to withstand the severest of operating conditions of the ambient environment and the process medium.

## Design standard

EN837-1; DIN 16085

## Dial sizes, ranges & accuracy

Possibilities in ranges and accuracies are led by the dial size. Accuracy class is based on dry gauges. Liquid filling can affect the accuracy.

Dial size	Ranges	Accuracy
100mm / 1 contact	0...1,6 to 0...1600 bar	1.0%
100mm / 1 contact	0...1 to 0... 1600 bar	1.6%
100mm / 2 contacts	0...2.5 to 0...1600 bar	1.0%
100mm / 2 contacts	0...1.6 to 0...1600 bar	1.6%

## Mounting variation

Not all gauges are suitable for some mounting variations. For the BDT18 series the mounting variations are below.

- **type A** (10) bottom connection, direct mounting
- **type C** (11) bottom connection, surface mounting (back)
- **type D** (30) Lower back connection, direct mounting
- **type E** (32) lower back connection, panel mounting (front)

More specifically per dial size:

Dial size	A	B	C	D	E	F
100mm	•		•	•	•	

## Process connection

Dial size	Standard thread	optionally	SW size
100mm	G ½ A or ½" NPT	M20x1.5	22mm

Other thread standards such as ISO 7-1 R (BSPT), or DIN 13-1 can be selected as well.

-> See datasheet "thread information" for specific thread details

## Materials of construction

	BDT30	BDT30...M
Case	AISI 304	AISI 316
Bezel		
Connection <sup>1</sup>	AISI 316	Alloy 400
Sensing element <sup>1</sup>	AISI 316	Alloy 400
Movement	Stainless steel	
Pointer	Aluminium	
Dial		
Window gasket	NBR	
Blow out		
Fill plug	NBR (HNBR for filled gauges)	
Mounting flanges	AISI 304	AISI 316
Window	Acrylic	
Cable terminal box	Polyamid 6	

\*1 wetted materials

## Pressure limitations

The gauge are built to withstand harsh environments however the EN 837 limits the use of a pressure gauge according below table.

Dial size	Steady	Fluctuating	Short time
100mm	FSV	0.9 x FSV	1.3 x FSV

FSV: full scale value

## Temperature limitations

The gauges can withstand ambient and process temperature up to a certain limit. The limitations on temperature are:

	Ambient	Medium
Dry	-40°C ... +60°C	-40°C ... +200°C
Filled	-20°C ... +60°C	-20°C ... +90°C

The variation of indication caused by the effect of temperature shall not exceed:  $\pm 0.4\% / 10K FSV$

## Pointer

Standard pointer is a fixed black painted aluminum pointer. Because of the contact mounting no options are available.

## Dial facing

The dial plate is made from aluminum and coated with UV resistant white coating. The black dial markings, scale, numbering, and interval is according the EN 837. Options like colored dial, customer logo, or colored segments are possible as well. Scale interval and numbering is following the EN837.

## Limit stop

To prevent permanent damage after overpressure, or sudden vacuum and the gauge is protected by an internal limit stop on the movement that is set just below the minimum scale value and just outside the 130% maximum scale value. These gauges also have a free zero.

## Cable terminal box

For type A & C the cable terminal box is fitted on the circumference of the case, Type D & E have the terminal box on the back of the case. This terminal box houses the terminals for the external wiring. The connector can be removed by unloosen the Philips screw. The male and female connector are sealed by an NBR gasket. Standard this is an IP65 Universal Cable Box type B suitable for electrical cables 7...13mm in diameter.

## Window

Standard BDT30 gauges have an acrylic window. Optional glass windows are available.

## Degree of protection

The BDT30 has a standard degree of protection of IP65. The values are determined according the IEC/EN 60529.

## Contacts

The BDT30 is supplied with a contact. The contacts can be low action, magnetic, inductive, or electric. It can be supplied with single or double contacts.

## Usable range:

For all contacts except magnetic contacts the usable range is 10%...90% of the scale. For magnetic contacts 15%...85% of the scale. When using a double contact, the recommended minimum distance between the two setpoints is 15% to 30% of the scale.

## Case filling

The BDT30 gauges can be filled with a dielectric fluid. The BPF03 fill fluid is a dielectric fill silicone fluid.

## Restrictor Screw

All gauges can be executed with a restrictor of 0.8 or 0.3 orifice in AISI316. For the Alloy 400 internal the orifice is 0.8mm.

## Certification & Declaration

### Calibration

Gauges are full range calibrated as a factory standard. Optionally you can select a 5 points calibration certificate, and a 10 points calibration certificate for the 0.6% and 0.5% gauges.

### Pressure Equipment Directive - 2014\_68\_EU

PED approval is given according article 3.3 and is valid for ranges >200 bar. All gauges will be marked accordingly. A declaration of conformity can be supplied.

### ATEX 114 - 2014/68/EU

ATEX restrictions are explained in the IOM and in the ATEX background datasheet. Only Inductive contacts are having ATEX approval.

### EN 10204 material certificate

A material 3.1 certificate on the wetted parts can be supplied.

## Dimensions table

### Type A (10)

Dial size	d	d1	b	L	h	h1	g	SW	H	weight
100	110.0	100.0	15.0	83.0	15.8	77.0	½ NPT	22	88.0	0.5 kg

### Type C (11)

size	d	d1	b	L	h	h1	K	D1	d2	g	SW	H	weight
100	110.0	100.0	15.0	83.0	15.8	77.0	117.0	130.0	6.0	½ NPT	22	88.0	0.5 kg

### Type D (30)

Dial size	d	d1	b	L	h	H	g	SW	weight
100	110.0	100.0	15.0	83.0	30.0	116.0	½ NPT	22	0.5 kg

### Type E (32)

Dial size	d	d1	b	L	h	H	k	D1	g	SW	weight
100	110.0	100.0	15.0	83.0	30.0	116.0	117.6	132.0	½ NPT	22	0.5 kg
